ASSOCIATED PROJECTS INFRA

Who we are

Associated Projects Infra is a leading provider of Infrastructure & civil construction services with a one-stop solution. Established in 1994 by Sri Ch Purna Chandra Rao, our Founder, has consistently delivered projects adhering to applicable technical specifications, Quality Standards, Safety Protocols & Stipulated Project Schedules. Over the years, we've grown into a quality-focused organisation serving the infrastructure and construction sectors with a broad array of services.

Our company specialises in Civil Construction, Excavation Works, Ground Engineering Works-Soil Stabilization & retaining works, Pipelaying (Utility & Hydrocarbon). We have expertise in a variety of rock excavation methods, including Controlled-blasting, non-blasting techniques like chemical application for rock splitting, diamond rope cutting. We undertake piling in various diameters for foundations & Shoring works.

Our proven track record of completing complex projects on time has earned us a reputation for reliability and excellence. Our Sustained financial growth reflects our commitment to client satisfaction. We ensure projects are completed within approved budgets and schedules focusing firmly on quality.

We have Successfully completed challenging projects for multinational firms, private equity firms, industrial corporations, top global IT companies, and leading commercial and residential developers. Our operational footprint spans Hyderabad, Bengaluru, Amaravati, and Vishakapatnam, with proactive plans to extend into key regions across India to solidify our growth.

Vision

To be a world-class infrastructure company that enhances the quality of life through collaboration and innovation.

Mission

To be a dynamic organisation that consistently delivers the best in construction services.

Values

Safety-first policy • Passion for excellence
Client-centric • Team synergy • Continuous learning
High morale in execution • Sustainable practices

Services we offer

They include a wide range of land development activities, from site preparation to building superstructures.

Land Development

Careful planning and expert supervision are essential for project success. From soil grading and ground levelling to deep excavation in challenging environments, we've set the standard. Our land development services include:

- Excavations in all soil types and grading
- Ground levelling and surveying
- Hard rock excavations (Controlled-blasting and non-blasting)
- Deep excavation for basements and cellars

「Peripheral & External Development Works」

As a critical part of infrastructure, we help build and improve road networks, which, in turn, support water and petroleum distribution. Our services include:

- Road construction
- Water and petroleum pipeline installation
- Utility trench construction (e.g., cable laying)

Ground Engineering

It's the application of geological principles in construction activities. Our extensive experience in this domain allows us to offer practical solutions for soil-related challenges.

Ground improvement for foundations is required whenever soils have a lower capacity to resist the load, i.e. lower soil bearing capacity. This involves constructing structural elements to transfer the load downwards to the stronger soil or rock beneath.

Earth retention successfully retains earth for lateral load protection (slope protection) so it doesn't move or shift until the mass excavation is completed.

Our services include

Bored Cast In-situ Piling

Secant Piling

Sand Piling

Soil Nailing

Diaphragm Wall

Micro Piling

Soil & Rock Anchoring

Shotcrete Works

Civil Construction

From planning to construction, we handle every aspect of civil engineering projects. Our design specialists and engineers use advanced equipment and techniques to ensure project success. Our pride lies in the diversity of projects executed, including:

- Data-centre construction
- Industrial manufacturing hubs
- Industrial logistics parks
- Educational and hospitality facilities
- Commercial and residential units

These are the Milestone Infra Projects Executed by us

Projects Executed

Kothur Logistics Park – (Horizon Industrial Parks Pvt Ltd – Client)

- 42 acres of land development – Excavation, Soil grading, Controlled Rock Blasting, Cutting & Filling
- Construction of Logistic Warehouses – 4 Blocks Warehouses
- The average area of a warehouse – 22,000 Square metres (Built-up Space - 2,36,000 Square Feet)
- Total Built up area – 22,000 * 4 – 88,000 Square metres (9,47,224 Square Feet Built up Space)
- FM2 Flooring type
- Construction of Utility blocks

All Cargo Logistics & Industries

- Construction of a warehouse block with FM2 Flooring type with area – 1,60,000 Square feet
- External Development Works – Drains Construction & Pavers, Kerb stone Laying

Amazon Data Centre - AWS

- 35 Acres of Land Development with Excavations for Buildings and others, Grading and Backfilling
- All PCC & RCC works for Buildings, Boundary Wall, HSD Tanks, Pump Rooms and Electrical Panel Room
- All finishing works, along with waterproofing, fabrication and Type-4 Power Float Concrete Flooring, have been executed
- 850 chambers of various sizes are built throughout the site premises for MEP services and SWD works, with De-Silting Chambers and rainwater harvesting Pits.
- Laying of Communication Fibre cables and electrical cables for LV/HV
- External Development works like Driveways, PQC Roads, Thermoplastic paint, Signage boards & etc

Project Under Execution

Daifuku Intralogistics India Private Limited

- Production block Construction
- RCC Buildings & External Development Works
- Project area - 18 acres
- RCC Building works – Production block with FRC (Fibre Reinforced Concrete) Flooring type.
- Production block area – 25,000 Square metres (2,69,000 Square feet)
- Admin & Canteen Building
- Utility & Security Blocks
- External Development works – Construction of Boundary wall, Laying of Roads, Pathways, Rainwater Harvesting Pits, MS PipeRack
- PHE – Internal & External – Construction of Stormwater & Sewerage Drains
- Fire Fighting Facilities

Sri Madhusudhana Sai Institute of Medical Science and Research

600 bedded Multi-Specialty Hospital is being constructed. The built-up area of this project is 6,50,000 Square Feet covered with G+5 Structure. Our Scope of work is Civil Works-Core & Shell with Finishes.

Plant & Machinery

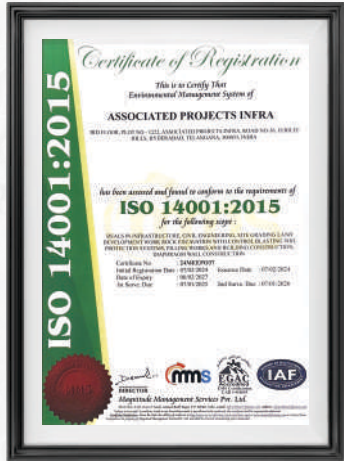

Our machinery and equipment speak all about us.

From survey and civil construction to excavation, below is the list of machinery and equipment we provide:

- Excavators
- Dumpers
- Jack Hammer Drills
- Wagon Drills
- Explosives Mobile Magazines
- Seismographs are used for stringent monitoring to observe and follow preventive measures during controlled blasting operations
- Water Tanker with Sprinkler Attachments
- Dozers
- Dewatering pumps
- Diamond Rope Cutting Units
- Blasting Mats / Rubber Mats are used to control the rocks' fly in hard rock blastings
- QC Lab
- Pile Load Testing Equipment
- Backhoe
- Hydraulic Rotary Rig
- Shuttering Material
- Batching Plant
- Concrete Pumps
- Concrete Transit Mixers
- Bar Bending & Cutting Machine
- Mobile Light Towers
- Mobile Tower Crane
- Captive Power Generators
- Formwork & Staging Material
